TALK | How Walt Put a Man on the Moon  
3-4:30pm | Theater  
Tickets: \$10 members, \$12 non-members

Get ready to blast off on an outer space adventure with Disney historian Jim Korkis and space historian Eric Toldi as they reveal how Walt Disney teamed up with scientists to encourage America to aim for the stars.

---

LITTLE OPEN STUDIO | Make a Shooting Star  
10am-noon | Learning Center, Art Studio  
FREE for members or with museum admission

Let's celebrate the sky! Make your very own shooting star or flaming comet using a variety of colorful materials.

---

OPEN STUDIO | Orbiting Planets and Multiplane Animation  
10am-5pm | Learning Center, Digital Media Studio  
FREE for members or with museum admission

Join us for a hands-on experience animating the solar system using our Multiplane Camera stations. Create your own planets, and then dabble with timing and spacing to imitate how they orbit at different speeds around the sun. In our art workshop, help us build a Martian colony, with fun, hands-on ways to think like NASA engineers. This unique colony, inspired by the Experimental Prototype Community of Tomorrow, lets kids apply science, technology, engineering, and math (STEM) skills to solve design challenges and answer the important social questions that must be tackled before our big trip to the Red Planet!

---

SPOTLIGHT TALKS | Man in Space  
11am, 1pm & 3pm | Gallery 9  
FREE for members or with museum admission

Explore Walt's influence on space exploration in the 1960s with a guided experience with museum educators.

---

FILM | Man in Space  
11am | Theater  
FREE for members or with museum admission

Ever wondered about rockets, satellites, or space travel? Join us for a special screening of *Man in Space*, an inside look at all things zero gravity.
